

YOUR PARTNER IN PREPAREDNESS

The **EPS** team brings real-world experience to our clients, with a range of backgrounds and depth of expertise in public safety, emergency management, military, public health, and related fields. We work with stakeholders to identify and understand your unique needs; developing innovative **emergency preparedness solutions** to meet those needs. Our goal is to enhance your capabilities and improve performance.

Emergency Preparedness Solutions provides a comprehensive suite of preparedness services for all clients and all hazards. We leverage an extensive cadre of subject matter experts, utilizing data and technology integrations to support more meaningful outcomes.

"Emergency Preparedness Solutions did a fantastic job for the Airport Cooperative Research Program (ACRP) through their expertise in emergency management operations and training, their thoroughness in approach to all tasks, ability to communicate effectively to all stakeholders, and their project management abilities. EPS developed a comprehensive plan for achieving project objectives, executed the plan efficiently, and were nimble in response to the findings of their research. This has resulted in the airport industry now having an EOC exercise and training tool that is based on sound learning objectives and appropriately validated by experts within the industry. I wouldn't hesitate to work with the EPS team again."

Marci Greenberger, Senior Program Officer
Transportation Research Board

SERVING GOVERNMENTS, BUSINESSES, AND NON-PROFITS ACROSS THE US AND CANADA

Our clients include federal agencies, states, Urban Area Security Initiative (UASI) regions, local emergency planning commissions, counties, cities, towns, villages, public health departments, departments of transportation, emergency management agencies, airports, utilities, private businesses, event centers and sporting venues, research institutions, tribal nations, and non-profit organizations in the US and Canada.
